ARTICULATION OF TRANSFER AGREEMENT

Bryan College (BC) and Cleveland State Community College (CSCC) hereby enter into a partnership that promotes academic opportunity for students through this transfer and program articulation agreement. This academic alliance allows transfer of Associate of Science (AS), Associate of Arts (AA), Tennessee Transfer Pathway (TTP) and Associate of Applied Science - Business (AASB) (includes all concentrations within the AASB) degrees in any discipline and related transfer of curriculum credit from CSCC to BC AGS. This agreement is to be reviewed and revised, if necessary, by representatives of both partner institutions. CSCC staff will promote the scholarships and articulation described herein to CSCC students during the advisement process.

Students who are conferred the AS, AA, TTP or AASB will be granted junior status upon entering the BSBA or BSAP program at BC in AGS and will be awarded at least 60 semester hours of transfer credit. BC will apply up to seventy-six (76) credit hours described herein toward the bachelor degree. Credits will first be applied to fulfill general education requirements (except Bible requirements). Additional credit hours transferred from CSCC beyond the required sixty-hour (60) minimum will be applied as additional elective credit hours towards the 124-hour Bachelor of Science requirement at the discretion of the registrar at BC.

Official transcripts will be required for transfer of credit. Transfer students must meet the entrance requirements for their respective program. They must have a cumulative grade point average of 2.0 (C) or higher. Transfer courses must not duplicate other courses for which credit has been awarded. Developmental or pre-college courses are not accepted for transfer. A maximum of twelve (12) credit hours of CSCC Cooperative Education courses may be transferred.
